Graphic RECORDING

Graphic Recording is the art of visually capturing ideas in real time. During meetings, conferences, or workshops, I actively listen and translate key messages into a mix of drawings, keywords, and diagrams. This engaging visual summary helps participants retain information, encourages collaboration, and brings conversations to life.

Murals

Custom murals bring spaces to life with bold, expressive visuals tailored to their environment. Whether for a private residence, commercial venue, or public space, each mural is designed to reflect the identity, energy, and purpose of the place. The mural can also be co-created with participants, offering a collaborative and engaging experience.
